To Lyle Jaffe,

5127 '99 JUN 25 A9:50

This is in regard to the egg industry which causes forced molting on hens used for egg production. The hens are starved up to 14 days until they lose 25% of their weight. Then the hens will lay more eggs. This is very cruel to the hens.

I would like you to ask the FDA under #98P-020 3JCP that would eliminate this practice. Also I would appreciate an answer.

(over)

98P-0203

C1670

Sincerely,

Maxine Jaffee
